FULL STACK DEVELOPER

I'm a Full Stack Developer skilled in **JavaScript, TypeScript, Flutter, Tailwind CSS, React, Next.js, Node.js, Express**, NoSQL, SQL, and Puppeteer. I write clean and scalable code, and I stay up-to-date with the latest technologies to deliver innovative solutions.

I run a **Blog** and **YouTube Channel** where I teach concepts about programming and web development in general.

EDUCATION

2021 - 2024
UTU
Diploma in Computer Science

2024 - Present
CKPCET
B.E. in Information Technology

SKILLS

- **Languages: JavaScript, TypeScript**
- **Frontend: React, Next.js, TanStack**
- **Backend: Node.js, Bun, Express, Nest.js, Go**
- **Database: SQL, NoSQL, Drizzle, Prisma**
- **Other: Puppeteer**

EXPERIENCE

Full Stack Developer | Roofer.com, USA, Remote
June 2023 - May 2024

I handled the front-end with **Next.js, React, Tailwind CSS & Shadcn UI** with a team of experienced developers working on **multiple production-ready web apps**. The backend used was **Supabase with serverless architecture**.

Frontend React Developer | VertexDev, Australia, Remote Contract

I contributed to the development of interactive and user-friendly web applications using React and Next.js.

PROJECTS

Prompt - Issue Management Web App
Freelance Project - Screenshots

An Issue Management Web Application for an IT company to track client issues, comment, assign, and search them by client name. Additionally, a work-in-progress page to see status of issues in real-time

Whim
Personal Project - whim.day

Whim is a simple and secure app for sharing secret messages anonymously. The messages are end-to-end encrypted and are vanished after being read. No account required. **Open-source**

Easy Pastes
Personal Project - GitHub Repository

A web app where users can easily paste some code they want to share with someone with syntax highlight and they can make it public, private or unlisted. More on blog.usmans.me/easypastes

WhatsApp REST API
Freelance Project

A REST API that uses WhatsApp Web in the background to send messages programmatically. And then taking it further to handle multiple WhatsApp connections & sessions at the same time and do the processing on cloud.

AliExpress Order Extractor & Google Sheets Integration
Freelance Project

A web scraper built with Node.js and Puppeteer to log in user, extract each of their order information, tracking information and update a Google Sheet using the Sheets API every few hours automatically.

Hacktoberfest Project Finder
Personal Project - https://finder.usmans.me

A website for developers to find open-source GitHub projects to contribute to in Hacktoberfest. It has features of search, sort by factors, find by language, etc.

ACHIEVEMENTS
